

Changeover Reduction

A Structure Program of Work, Utilising the Well-Known Technique of SMED (Single Minute Exchange of Dies), to Streamline a Priority Changeover Process and Provide an Ongoing Methodology for Further Improvements.

Testimonial

"The structure, approach and facilitation of this program were excellent. Through MBC Ltd. coaching support, I now have the confidence to lead this activity in the future."

Outline

Delivery and facilitation of customised SMED workshops & techniques, focused on a selected changeover to reduce planned downtime and provide a defined process and methodology to continually optimise changeovers throughout your business.

This activity also supports the introduction of more effective storage solutions for change parts, enhancement of 5S workplace organisation and ensures a safe working environment is in place.

Key activities include:

- **Coaching with Site Champion / Lead**
- **Creation of Customised Materials**
- **Assessment of Historical Performance**
- **SMED 'Before' & After Workshops**
- **SMED 'Go & Do' Workshops**
- **SMED Process Mapping Workshops**

Benefits

- Provision of SMED Training, Teach Points and Templates.
- Standard Method to Optimise ALL Changeover Processes.
- Optimised Changeover Process Reducing Downtime.
- Defined Standard Operating Procedure for Focus Changeover.
- Improved Workplace Organisation and Asset Care.
