Outline

Effective Project Management is a critical competence for all businesses to have as a strength. The key objective of this program is to develop a customised and user friendly toolkit, which can then be applied to current and future projects, and process improvement activities.

Along with training sessions to raise awareness and understanding of Project Management, we also provide experienced coaching support to help your people define clear objectives for their projects, create realistic timing plans, manage progress effectively and lead through to implementation.

Key areas of focus are:

- **Project Charters**
- **Stakeholder Management**
- **Success Measures**
- **Timing Plans**
- **Progress Reviews**
- **Action Tracking**
- **Visual Boards**

Benefits

- Effective Project Management Training & Teach Points.
- Creation of Generic Templates for Project Charters, Timing Plans, Success Measures and Action Tracking.
- Implementation of Regular Progress Reviews and Visual Displays.
- Setup and Progress Tracking of Planned Improvement Projects.
